

Creating maps with The Town™ Software is as easy as 1, 2, 3!

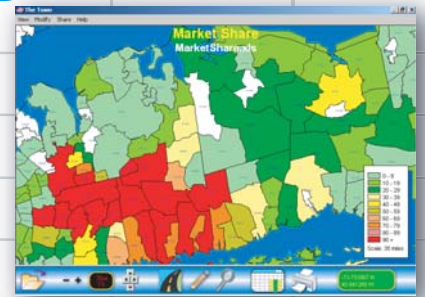

1 Open a Spreadsheet

2 Highlight the Cells

3 Click Create Map

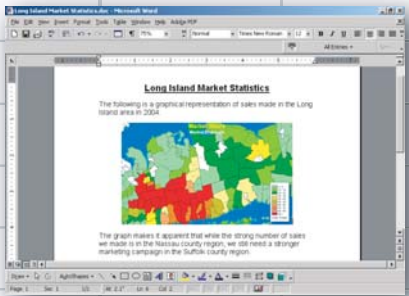

Benefits

- Graphically visualize your data by placing it on a custom map
- Visualize opportunities that may have otherwise been overlooked
- View the relationships between your data and locations
- Import your custom maps seamlessly into Microsoft Office applications
- Print handouts of your custom maps for meetings and presentations
- Maps are vector based so they can be printed at any desired size

Features

- Create maps from your pre-existing Microsoft Excel® spreadsheet data
- Layered data sets allow you to choose the options you want to display (Ex. Streets, Rivers, Labels, etc.)
- Customizable annotation features such as map colors, topographical elements, text, and much more
- Vector based maps allow for infinite zoom levels
- Export maps to Bitmaps, allowing them to be used in other software products
- Filter spreadsheet lists based on geography

Use in MS Word®

Use in Presentations

Use in MS PowerPoint®
